

## ESG Scores & Data to Elevate Your Workflows

Insightia's ESG module provides science-based ESG risk scores and metric breakdowns from leading ESG platform provider Clarity AI. ESG scores enable investors, consumers and companies to align their ESG strategy with the indented purpose. Clarity AI ESG scores provide detailed information and scores on the 35 key ESG risk factors, including the most relevant standards such as SASB and TCFD.

The scores are calculated using Clarity AI's proprietary methodology using data sourced from publicly disclosures and 30+ external data partners. The granularity of the underlying information allows transparency on E, S and G scores for customized analysis and unique insights.

### Data Overview

**ESG Score Company Count:** 15,000+

**Coverage:** Global

**Data Update Frequency:** Every two weeks

**Scoring Methodology:** ESG scores are calculated using Clarity AI's proprietary methodology, which is applied directly to raw data to generate a score ranging from 1 (worst) to 100 (best). The calculation process is different for each of the three metric types – quantitative, policies, and controversies.

**History:** Begins 2012

**Delivery channel:** Desktop

**Interconnectivity:** Insightia's *Governance* and *Activism* modules

**Coming Soon!**

**Raw Environmental Metrics:** Scope 1-3 CO2 Emissions, Energy Consumption in GWh, and Total Water Consumption (in cubic meters)

### Also included in the ESG module:

**Leveraging Insightia's expertise in shareholder engagement and governance insights:**

- **ESG Activist Campaigns** | Details of environmental, social, and governance-related activist campaigns
- **Company Board Summary** | Number of directors, average tenure and age, ethnicity and gender breakdowns
